

Differentially Expressed Genes by glp1agonist Status in Hep-1 cells

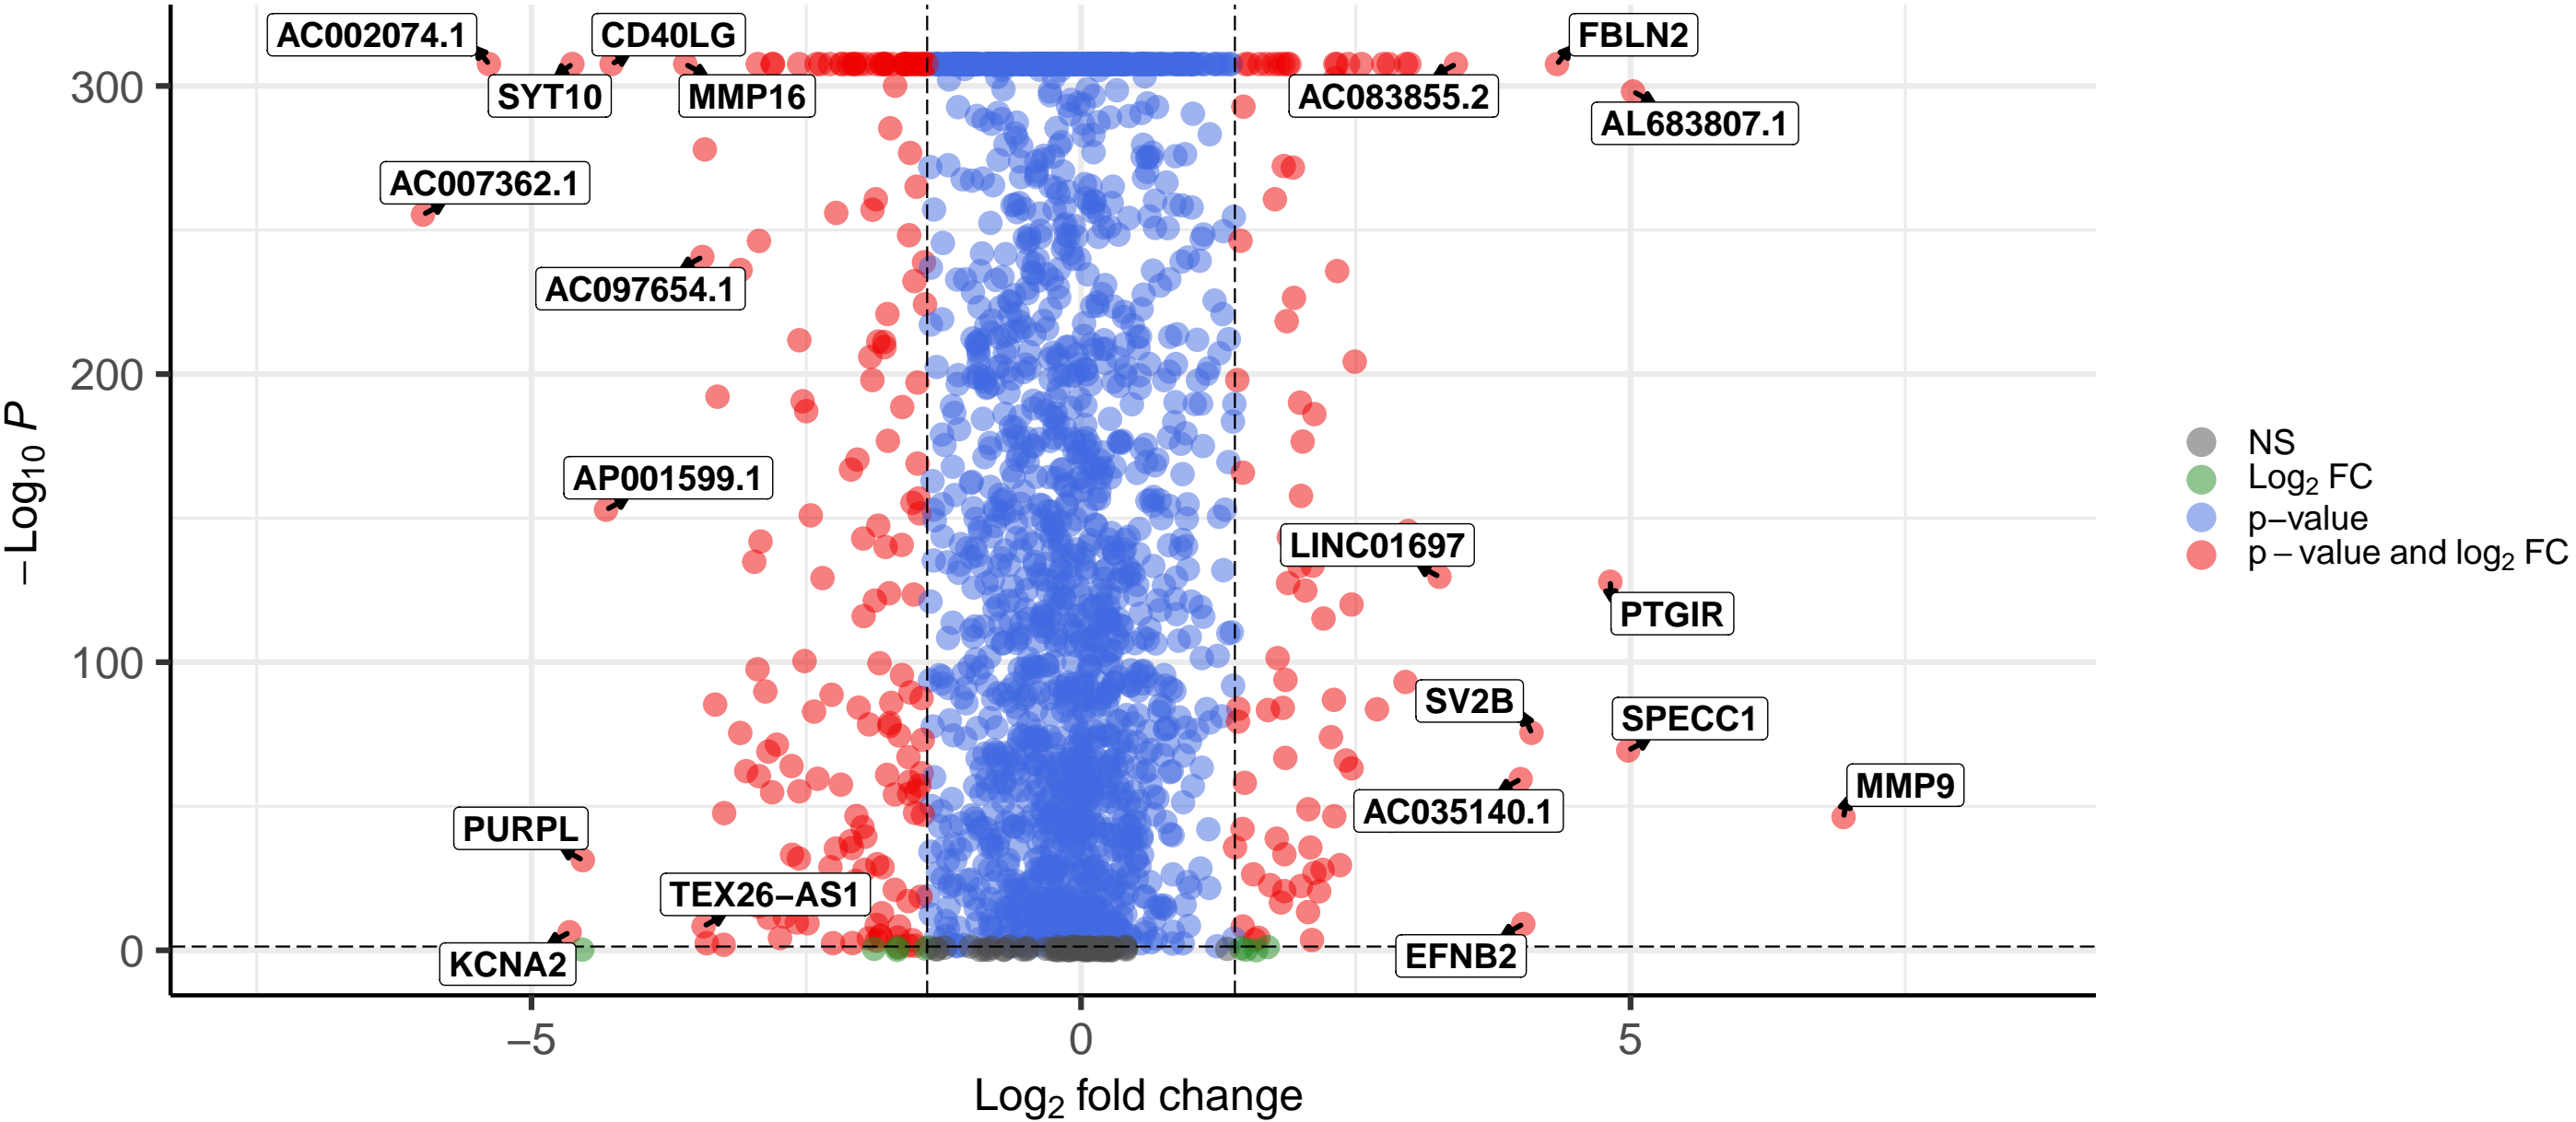

Positive Log2 FC = Greater Expression in glp1agonist vs. No glp1agonist
(Significant at FDR-P<0.05, FC Threshold = 0.5)

total = 1921 variables

Differentially Expressed Genes by glp1agonist Status in Hep-2 cells

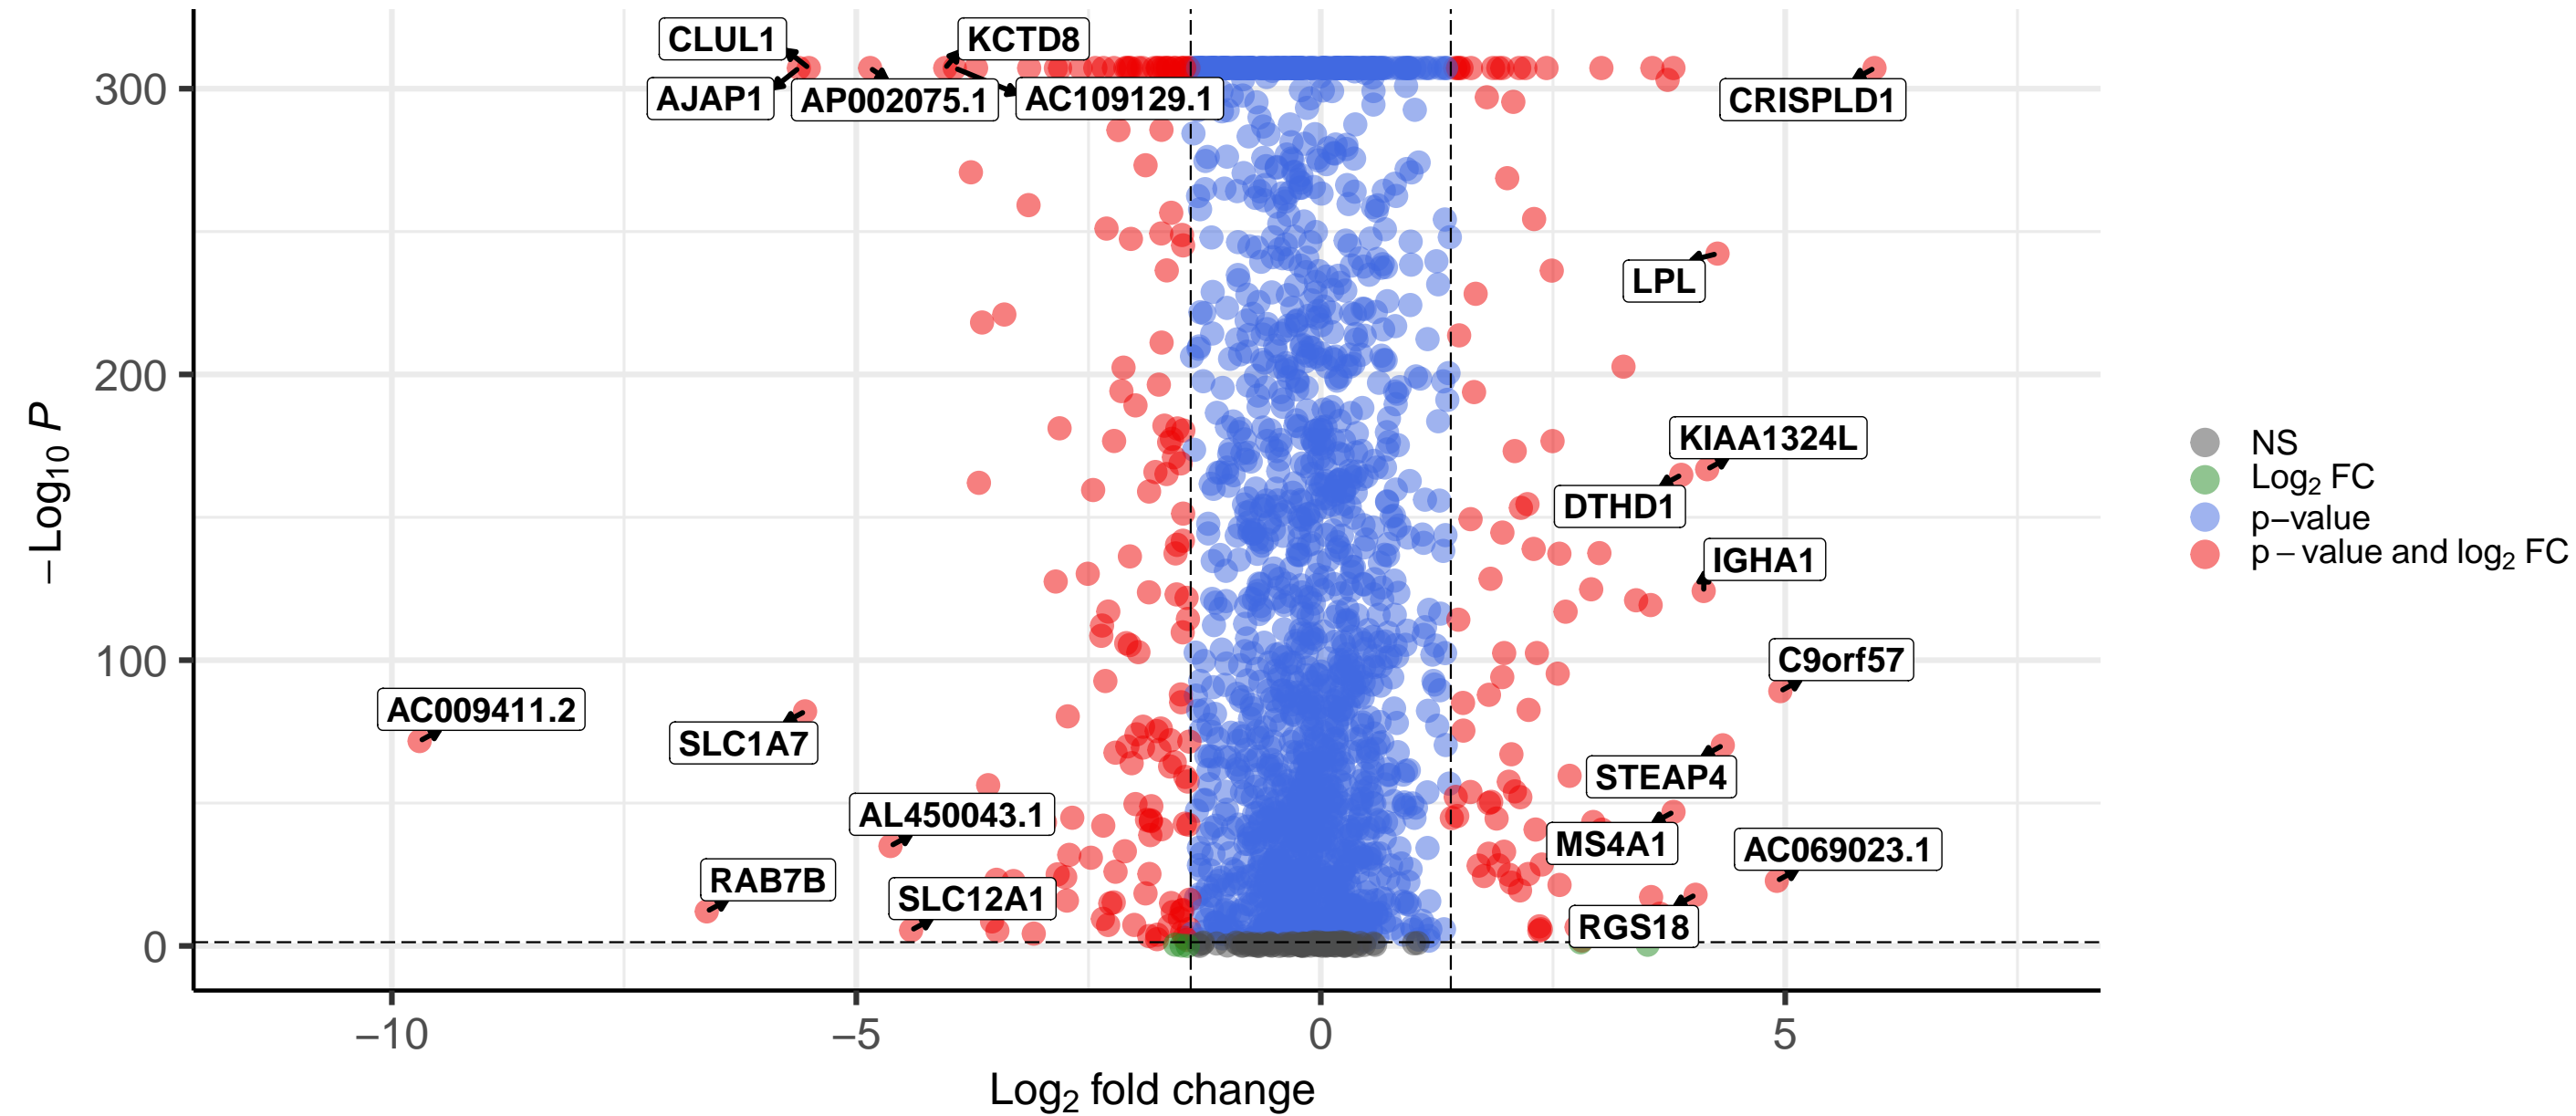

Positive Log2 FC = Greater Expression in glp1agonist vs. No glp1agonist
(Significant at FDR-P<0.05, FC Threshold = 0.5)

total = 1911 variables

Differentially Expressed Genes by glp1agonist Status in Hep-3 cells

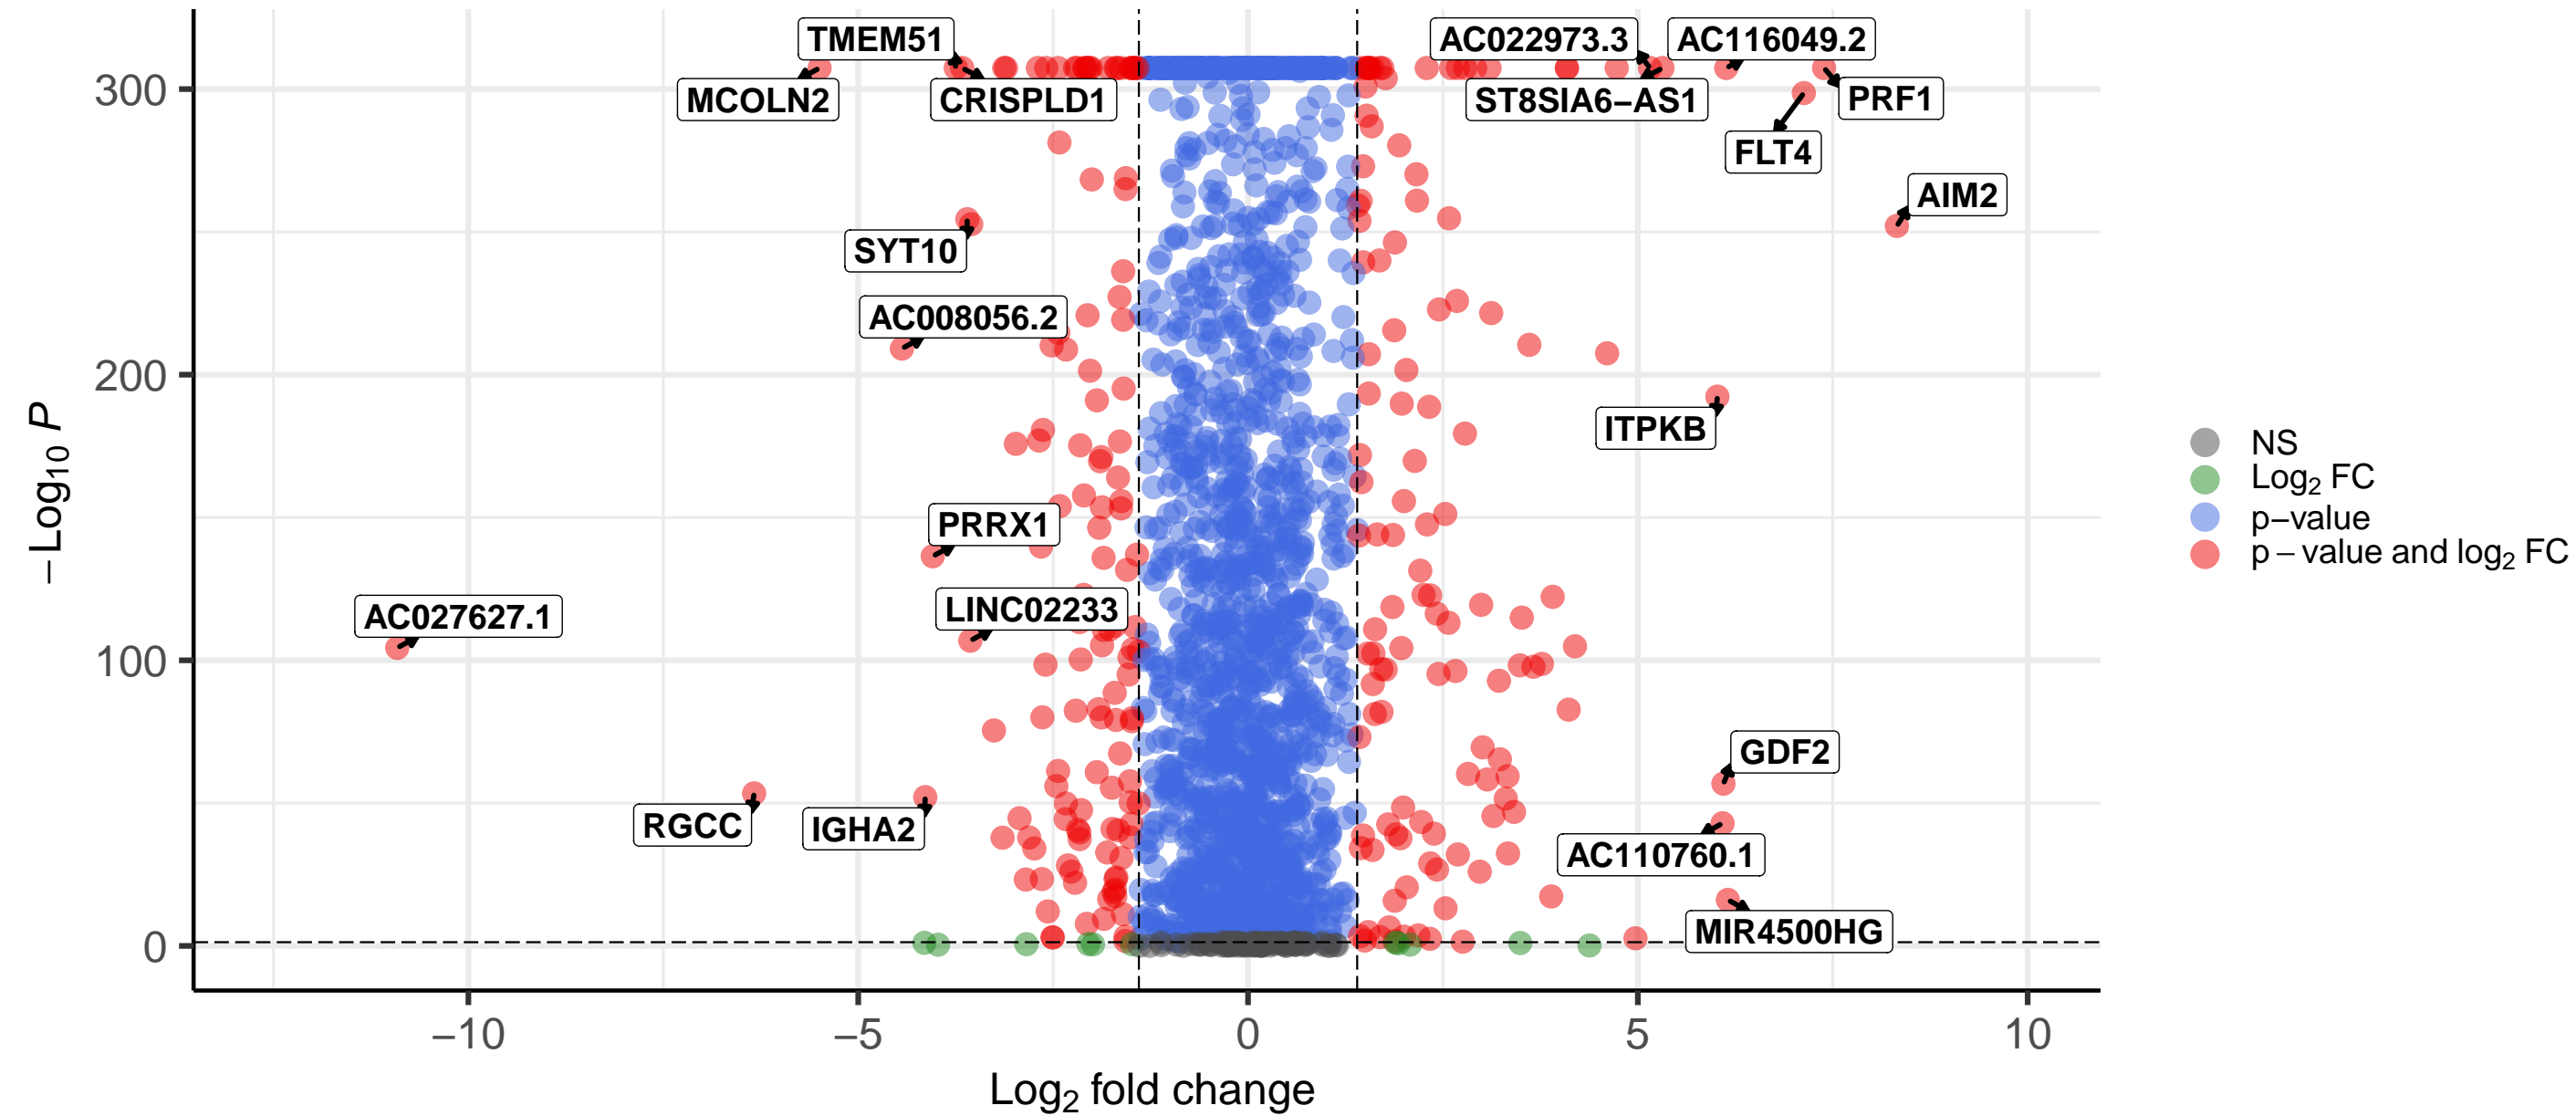

Positive Log2 FC = Greater Expression in glp1agonist vs. No glp1agonist
(Significant at FDR-P<0.05, FC Threshold = 0.5)

total = 1911 variables

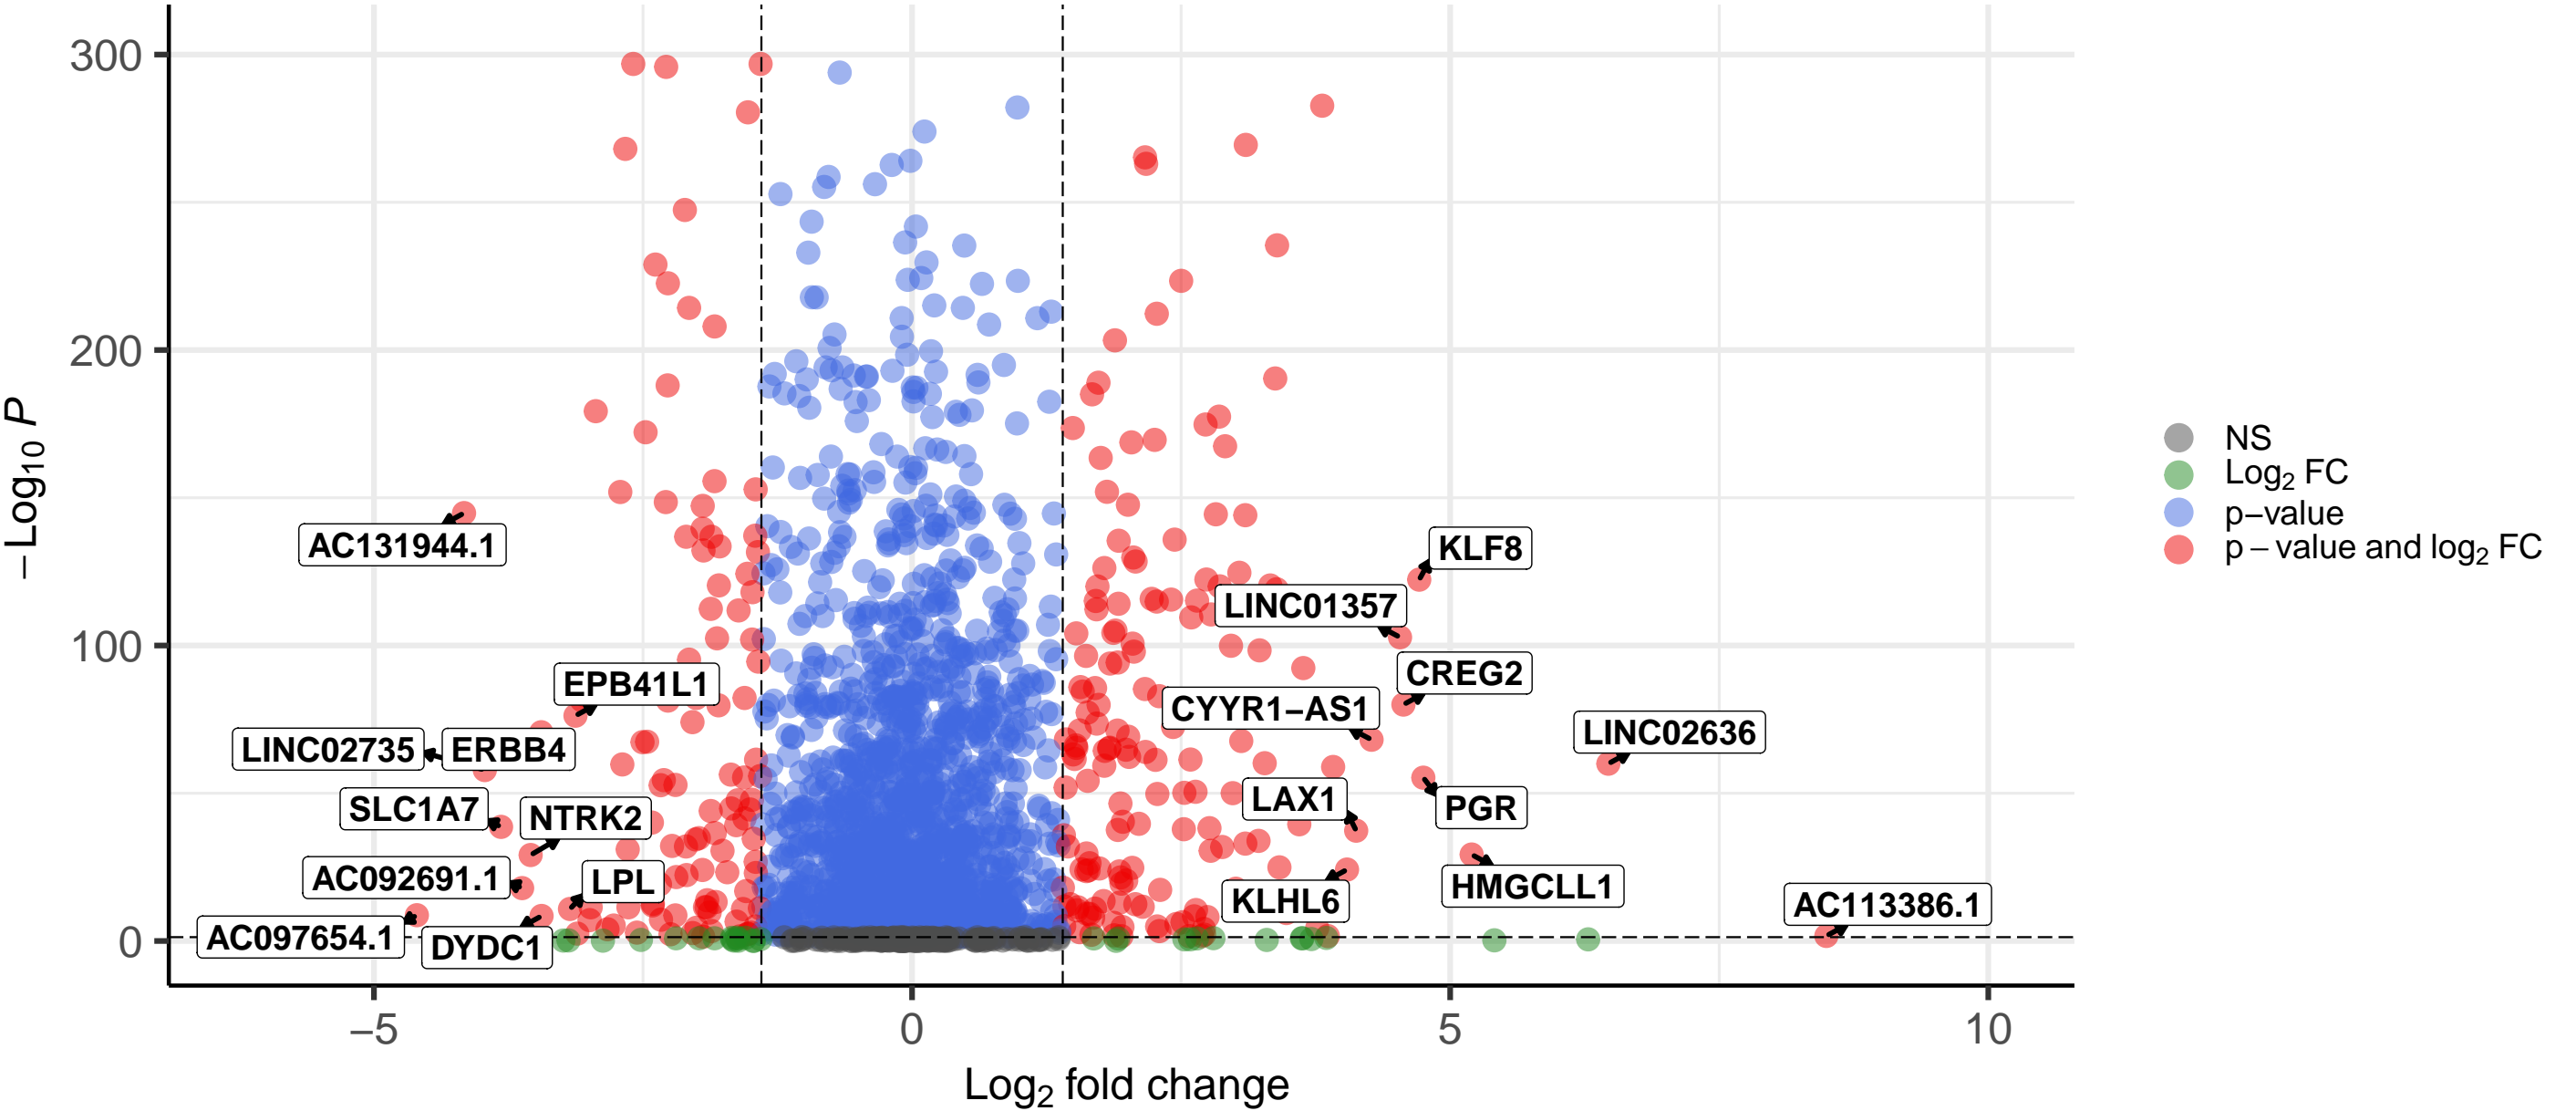

Differentially Expressed Genes by glp1agonist Status in Hep-4 cells

Positive Log2 FC = Greater Expression in glp1agonist vs. No glp1agonist
(Significant at FDR-P<0.05, FC Threshold = 0.5)

Differentially Expressed Genes by glp1agonist Status in Hep-5 cells

Positive Log2 FC = Greater Expression in glp1agonist vs. No glp1agonist
(Significant at FDR-P<0.05, FC Threshold = 0.5)

total = 1926 variables
